

# The Bumpstop

www.bumpstop.co.uk

Made in England by

Project eng.co.uk

Safe and secure fixing for ALL bikes stationary or in transit..

- **Fully secure** when used in conjunction with a lock through the front wheel and around the in-built security bar.
- **Easily fixed** allowing use in car parks, garage, van, trailer, workbench, show stand etc.\*
- **Adjustable** for wheel sizes from scooter to offroader.
- **Light weight** all welded construction.
- **Easy, one man, loading** and removal of bike. Holds bike securely upright.
- **Allows working access** to all areas of the fully supported bike.
- **Small sub-plate** available for fixing in van/trailer etc. **Large sub-plate** can be used for free standing.

Alto Performance Racing have tested this equipment for over 5 years without damaging road or race bikes or the expensive tyres.

\*Using small sub-plate ideal for van or trailer

## Affordable security and transportation.

- £99.00 Direct fixing
